- (c) The accounting treatment prescribed above can be illustrated by the following numerical example:—

Suppose a company issues 500 shares on 1-4-1999 under an ESPS at Rs. 40 when the market price is Rs. 160. The accounting value of the shares being:

$$500 \text{ ₹ } (160 - 40) = 500 \text{ ₹ } 120 = 60,000$$

The accounting entry would be as follows:

1-4-1999	Cash	20,000	5,000
	Employee Compensation Expense	60,000	75,000
	Paid Up Equity Capital		
	Share Premium Account		

(Issue of 500 shares under ESPS at a price of Rs. 40 each when market price is Rs. 160)

(Clause 2.1)

- (i) The fair value of a stock option is the price that shall be calculated for that option in an arm's length transaction between a willing buyer and a willing seller.
- The fair value shall be estimated using an option-pricing model (for example, the Black-Scholes or a binomial model) that takes into account as of the grant date the exercise price and expected life of the option, the current price in the market of the underlying stock and its expected volatility, expected dividends on the stock, and the risk-free interest rate for the expected terms of the option.
- (ii) The fair value of an option estimated at the grant date shall not be subsequently adjusted for changes in the price of the underlying stock or its volatility, the life of the option, dividends on the stock, or the risk-free interest rate.
- (iii) Where the exercise price is fixed in Indian Rupees, the risk-free interest rate used shall be the interest rate applicable for a maturity equal to the expected life of the options based on the zero-coupon yield curve for Government Securities.
- (iv) The expected life of an award of stock options shall take into account the following factors:
- (a) The expected life must at least include the vesting period.
- (b) The average lengths of time similar grants have remained outstanding in the past. If the company does not have a sufficiently long history of stock option grants, the experience of an appropriately comparable peer group may be taken into consideration.
- (c) The expected life of ESOSs should not be less than half of the exercise period of the ESOSs issued until and unless the same is supported by historical evidences with respect to ESOSs issued by the company earlier.
- (vi) If the company does not have a sufficiently long history of traded stock prices to estimate the expected volatility of its stock, it may use an estimate based on the estimated volatility

of stocks of an appropriately comparable peer group.

- (vii) The estimated dividends of the company over the estimated life of the option may be estimated taking into account the company's past dividend policy as well as the mean dividend yield of an appropriately comparable peer group.
- (viii) Justification shall be given for significant assumptions. If at the time of further issue of ESOS/ESPS there are any changes in the assumptions, reasons for the same shall be given.

SCHEDULE IV

DISCLOSURE DOCUMENT

(Clause 5.1)

PART A

Statement of risks

All investments in shares or options on shares are subject to risk as the value of shares may go down or go up. In addition, employee stock options are subject to the following additional risks:

1. *Concentration*.— The risk arising out of any fall in value of shares is aggravated if the employee's holding is concentrated in the shares of a single company.
2. *Leverage*.— Any change in the value of the share can lead to a significantly larger change in the value of the option as an option amounts to a levered position in the share.
3. *Illiquidity*.— The options cannot be transferred to anybody, and therefore the employees cannot mitigate their risks by selling the whole or part of their options before they are exercised.
4. *Vesting*.— The options will lapse if the employment is terminated prior to vesting. Even after the options are vested, the unexercised options may be forfeited if the employee is terminated for gross misconduct.

PART B

Information about the company

1. *Business of the company*.— A description of the business of the company on the lines of item V(a) of Part I of Schedule II of the Companies Act.
2. *Abridged financial information*.— Abridged financial information for the last five years for which audited financial information is available in a format similar to that required under item B(1) of Part II of Schedule II of the Companies Act. The last

audited accounts of the company should also be provided unless this has already been provided to the employee in connection with a previous option grant or otherwise.

3. *Risk Factors.*—

Management perception of the risk factors of the company in accordance with item VIII of Part I of Schedule II of the Companies Act.

4. *Continuing disclosure requirement.*—

The option grantee should receive copies of all documents that are sent to the members of the company. This shall include the annual accounts of the company as well as notices of meetings and the accompanying explanatory statements.

PART C

Salient features of the Employee Stock Option Scheme

This Part shall contain the salient features of the employee stock option scheme of the company including the conditions regarding vesting, exercise, adjustment for corporate actions, and forfeiture of vested options. It shall not be necessary to include this Part if it has already been provided to the employee in connection with a previous option grant, and no changes have taken place in the scheme since then. If the option administrator (whether the company itself or an outside securities firm appointed for this purpose) provides advisory services to the option grantees in connection with the exercise of options or sale of resulting shares, such advice must be accompanied by an appropriate disclosure of concentration and other risks. The option administrator should conform to the code of conduct appropriate for such fiduciary relationships.
